

Using Technology While Making Your Music

A 4-week Series presented online using Zoom.

Hosted by Tellico Plains Pubic Library

Presented by Perry and Diana Brake of Honalee Home Music

Note: These sessions will be presented on an Apple iMac computer. However, since Most of the workshop is internet based a PC or Chrome Computer should give similar results. So will most tablets. Newer smart phones are a good bet also. Not so much old flip phones.

Another Note: Most of what we share during these workshops are free – BUT, there may be some premium options that we feel are worth the price. We don't endorse anything. This is just us sharing a little of what we know, and use.

Week 1 Handout – May 9, 2020

Topic – Finding Music Online

The session will be presented on an Apple iMac computer. However, since Most of the workshop is internet based a PC or Chrome Computer should give similar results. So will most tablets. Newer smart phones are a good bet also. Not so much old flip phones.
