

Using Technology While Making Your Music

**A 4-week Series presented online using Zoom.
Hosted by Tellico Plains Pubic Library
Presented by Perry and Diana Brake of Honalee Home Music**

Note: These sessions will be presented on an Apple iMac computer. However, since Most of the workshop is internet based a PC or Chrome Computer should give similar results. So will most tablets. Newer smart phones are a good bet also. Not so much old flip phones.

Another Note: Most of what we share during these workshops are free – BUT, there may be some premium options that we feel are worth the price. We don't endorse anything. This is just us sharing a little of what we know, and use.

Week 2 Handout – May 16, 2020

Topic – Gear and Apps

- | | |
|---|--|
| https://www.ultimate-guitar.com/ | A resource for Tabulature and Chords. Transposes. |
| https://www.azlyrics.com/ | A resource for Lyrics |
| https://theonlinemetronome.com/free-online-tuner-for-musicians.html | A chromatic Tuner |
| https://theonlinemetronome.com/free-online-metronome.html | A Metronome |
| https://www.ronimusic.com/ | Slows music and changes Pitch of a recording. Can isolate and loop portions of a song |
| https://chordify.net/ | Love this one. It detects the chords from a song and also can transpose and show Capo options |
| https://strummachine.com/ | A virtual band that you can practice with. Can change Keys and Tempo. No lyrics. Just backing music "Strums" |
| https://clipgrab.en.softonic.com/mac | Downloads Videos and Can Extract the Audio from online Video such as Youtube and Vimeo. |
| https://onsongapp.com/ | Replace your song sheet notebooks. Can transpose. Mac Only |
| https://www.linkesoft.com/songbook/ | Similar to OnSong but for Windows/Android Devices |
